

Hack your diet,
hack your health:
an AI supported
website

Project Objectives

Ensure the app is intuitive and easily navigable for users of all ages

Include detailed nutritional for suggested meals to aid users in making informed choices

Provide specific meals aligned with various health conditions e.g diabeties , hypertension , allergies

The Problems to Solve

01

Removing pressure on doctors as people can take care of themselves

02

People eat foods without knowing what it does to their bodies

03

Helps people who cannot afford health care or trips to the doctor

Offered Solutions

01.

Innovation
This app should
allow
User to input
health condition in

02.

Collaborative Team
We had a designer
for the interface , AI
model builder and
java script coder

03.

Growth Potential
Help in making a
grocery list aligned
with condition

Next Steps

Presenter Challenges

We were able to practice our presentation as
practice makes perfect

Thank
You.
